

## Mitered Napkins Folded Technique

By Cydney Gordon

1. Cut fabric in a square  $1\frac{1}{2}$ ' larger than your finished napkin.
2. On the wrong side of your fabric, mark lines on each side at  $\frac{3}{4}$ ". (Figure 1)

3. Fold and iron the raw edges of the napkin in to meet the drawn lines. (Figure 2)

4. Fold over again and press. (Figure 3).

5. When you open it up you will see fold marks. (Figure 4)

6. Fold the corner of the napkin in so the folds match up with the drawn and iron lines and press. (Figure 5).

7. Cut off along the diagonal line in the smallest "square". (Figure 7&8)

8. Keeping the upper, horizontal side open, refold and pin the vertical side of the napkin so no raw edges are exposed. (Figure 9)

9. Fold the raw edge of the diagonal cut down so it just barely touches the drawn horizontal marking line. The corner of that fold should match up with that line. (Figure 10)

10. Fold the raw edge of the horizontal back in so it meets the drawn line (Figure 11), and fold again and pin. to create a finished edge. (Figure 12). You should have a nice diagonal fold at the corner of the napkin.

11. Using whatever method you like, stitch the edges of the napkin down pivoting at the corners with needle down. (Figure 15)
